🎯 Profile

Highly motivated Computer Science student with strong expertise in Java and C. Proficient in data structures, algorithms, and system programming. Passionate about solving complex problems. Seeking a role in Software Engineering, Embedded Systems, or Backend Development to apply my skills and grow professionally.

🎓 Education

The Open University | B.Sc. in Computer Science | Graduation (2026/2027)

📌 Dean's List – **2023**, **2024** | **GPA: 91**

📌 Relevant Courses: -Algorithms - 95

- Introduction to Computer Science – 95

- C Lab - Linux – 93

- Data Structures – 89

🛠️ Technical Skills

✅ Programming Languages: Java, C, Python(basic)
✅ Operating Systems: Linux, Windows
✅ Concepts: OOP, Algorithms, System Programming

💻 Projects

🚀 Assembler for Linux:

✅ Developed an Assembler in C for parsing, processing and translating assembly code.
✅ Worked with symbol tables, memory management, and system calls in Linux.
✅ Utilized Makefile and unit testing to ensure code quality and efficiency.

🪖 Military & Professional Experience

📌 Combat Commander | 2.8 Years

✅ Led and trained teams in high-pressure environments.

🎇 Languages

- Hebrew – Native   - English – Great
